SUMMARY

Product designer with 3+ years across product and visual design, including 2+ owning end to end B2B and B2C SaaS. Designs multi role platforms for web and mobile, from information architecture and user flows through prototypes, accessibility, and developer handoff, and builds the design systems behind them.

EXPERIENCE

Product Designer

Apr 2023 – Jun 2025

Fountane Inc.

- Owned end to end design for 2 B2B and B2C SaaS platforms (hotel/trip and tax/task management), discovery and IA through developer handoff.
- Designed role based interfaces for 3 user types on one platform: operator dashboards, admin permission controls, and consumer booking flows, defining navigation and page hierarchy so each role saw only the actions relevant to it.
- Built and maintained a 30+ component library with design tokens and WCAG 2.1 AA states, including a custom 100+ icon set for hotel and travel workflows, adopted across client products as engineering's source of truth.
- Built and maintained end to end user flows and wireframes covering edge cases such as empty states, error and failure states, and role conflicts, resolving them in flows before visual design started.
- Shipped in two week Agile sprints with product and engineering, iterating on flows through design critique and engineering feasibility review.

Graphic Design Intern

Jan 2022 – Apr 2023

Skillonation Edtech

- Produced social, webinar, and campaign assets including illustrations and reusable templates across 3 channels.

PROJECTS

Jira Plugin: Automated User Management | [Link](#)

Apr 2026 – May 2026

- Full visual and user experience redesign of an enterprise user management plugin, rebuilding the layout, grouping, and component states against the Atlassian Design System to fix inconsistent typography, color, and hierarchy in the original interface.
- Designed the complete screen set and prototyped interaction states in Figma Make and Lovable to check the flow held together before handoff.

Designer Friend | [Link](#)

May 2025 – Jun 2025

- Ran competitive analysis of learning platforms and designed high fidelity prototypes for course tracking, mapping learner goals to a progress dashboard that shows status at a glance.

CERTIFICATIONS

Google UX Design Professional Certificate | *Coursera, Google* – [Link](#)

Issued: Sep 2025

Generative AI for UI/UX Design Specialization | *Coursera, IBM* – [Link](#)

Issued: May 2026

SKILLS

Core UX: Information Architecture, User Flows, Interaction Design, Wireframing, Prototyping, Edge Case and State Design, Competitive Analysis, WCAG 2.1 AA

Design Systems and Visual: Component Libraries, Design Tokens, Dashboards and Data Visualization, Icon and Illustration Design, Responsive Design, Atlassian Design System, Lottie micro interactions

Tools and Workflow: Figma, Figma Make, Lovable, Claude, Cursor, Jira, Agile sprints, Developer handoff, Design critique

EDUCATION

MBM University

Jodhpur, Rajasthan

Bachelor of Engineering in Petroleum

Nov 2020 – Jun 2024
